**Safety Toolkit for Consumer and
Personal Data Protection for the
Elderly During Internet Use**

This project has been funded with support from the European Commission.
This publication reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein. Project Number: 2020-1-CY01-KA204-065949

OVERVIEW

PROJECT OVERVIEW

The ageing rate in Europe increases every year and the technological advancements are not put on hold. The elderly usually lack awareness of current security threats, and remain under-educated to apply controls and safeguards during internet use. There is a strong need to educate them on how to access and engage in online activities by experiencing a high level of consumer and personal data protection.

AIM & OBJECTIVES

AIM

The e-Protect project aims to address the consumer and data protection needs during internet use of the elderly people through their familiarization with the use of ICT tools, by providing them tailored training opportunities that will meet the modern society challenges.

OBJECTIVES

1

Enhance capacity building and professionalization of adult educators regarding training elderly people for consumer and data protection during online activities.

2

Address the consumer and data protection needs during internet use of the elderly people through their familiarization with ICT tools, by providing them tailored training opportunities.

3

Improve the overall quality of adult education and specifically of the elderly in the participating countries informed by educational, cognitive, and technological research.

4

Strengthen the educational practices and reduce inequalities in access to education services for the elderly.
